PROFILE

I'm an undergraduate student currently in my third year at University of Staffordshire, studying Computer Games Design and Programming. I'm motivated and enthusiastic in every thing I do, and I have a strong interest in the game development industry. While working on my senior collab module I put myself forward as tech lead and am in charge of a team of 8 programmers, which allowed me to develop my communication and group work skills, as well as my leadership skills.

EXPERIENCE

Society Manager

Staffs Idol Society

Staffordshire University SU 2025-Present

- Organising events for the society both independantly and with other societies
- Attend Union ran events to represent our student group
